PAGE 2: Proposed Organ and Tissue Donation (Scotland) Bill Consultation

Q1: The overarching purpose of my proposal is to move from the current opt-in system to a soft opt-out system of organ donation. Do you support this move? Please indicate "yes/no/undecided" and explain the reasons for your response.

Yes,

Please give your reasons for your response: It makes good sense - it will save lives and at the same time it will not undermine people's right to say no to organ donation if they so choose. Behavioural economics as explained in the book "nudge" shows that human beings will often do the thing with least effort involved - so even though they may say they want to donate thier organs after death they will never get around to it in thier lifetime! This policy change will provide a solution to this contradiction between what people say they want and thier lack of action in doing it.

Q2: How essential is it to change the law (from an opt-in to a soft opt-out system) in order to achieve the intended benefits (increased transplant rates, reduced waiting lists)? Are there other (non-legislative) measures that could achieve similar outcomes without the need for legislation?

Respondent skipped this question

Q3: I believe the role of the family should be limited to being consulted on whether they are aware of any (unregistered) objection by the deceased rather than asking for their consent. Do you agree? Please indicate "yes/no/undecided" and explain the reasons for your response.

Yes,

Please give reasons for your response: Overall it is the individual's decision and even if the family do not like it they should respect the decision the deceased has made.

Q4: Do you think an individual should be able to appoint a proxy to the make the final decision regarding transplantation on their behalf? Please indicate "yes/no/undecided" and explain the reasons for your response.

No,

Please give reasons for your response: Only if they are medically unable to make the decision for themselves.

Q5: My proposal is that only adults should be automatically opted-in to be a donor. Younger persons would have to register to be a donor, by themselves or with parental consent as they currently do. This approach is I believe the best way to safeguard children and young people. Do you agree? Please indicate "yes/no/undecided" and explain the reasons for your response.

Yes

Proposed Organ and Tissue Donation (Scotland) Bill

Q6: Do you agree the age limit for an adult should be set at 16 years old? Please indicate "yes/no/undecided" and explain the reasons for your response.

Yes

Q7: Do you agree the soft opt-out system should apply to people who have been resident in Scotland for a minimum period of 1 year prior to their death? Please indicate "yes/no/undecided" and explain the reasons for your response.

Yes,

Please give reasons for your response:
There should be a minimum and 1 year seems sensible enough.

Q8: If you answered no to the above how long, if any, should this period of residency last before they become subject to the soft opt-out system? Would this residency need to be for a continuous period?

Respondent skipped this question

Q9: Do you think 6 months is a long enough period to run a campaign prior to change over?

Yes.

Q10: What is your assessment of the likely financial implications (if any) of the proposed Bill to you or your organisation? What (if any) other significant financial implications are likely to arise?

Unsure. But even if there are financial implications with the admin it would be money well spent.

Q11: Is the proposed Bill likely to have any substantial positive or negative implications for equality? If it is likely to have a substantial negative implication, how might this be minimised or avoided?

It shouldn't do as long as education of the new policy is delivered in a way that means it is far reaching and covers all people including minorities. An equality expert should be able to advise on this.

Q12: Do you have any other comments on or suggestions relevant to the proposal?

Respondent skipped this question
